

Atomic Search

Your shortcut to hassle-free content retrieval.

Are your students, teachers, and staff struggling to find their content? Meet Atomic Search! Simplify the search experience for your Canvas, Blackboard Learn, or Brightspace users and boost teaching and learning at your institution.

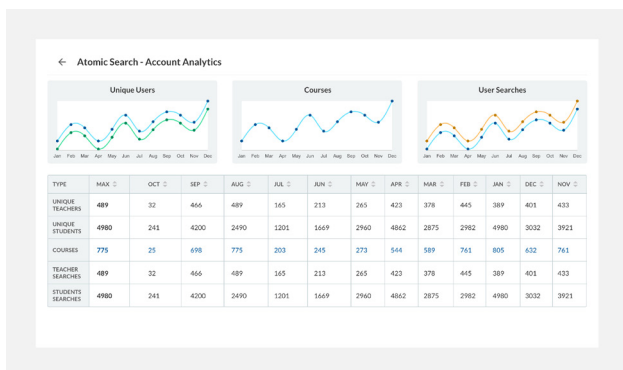

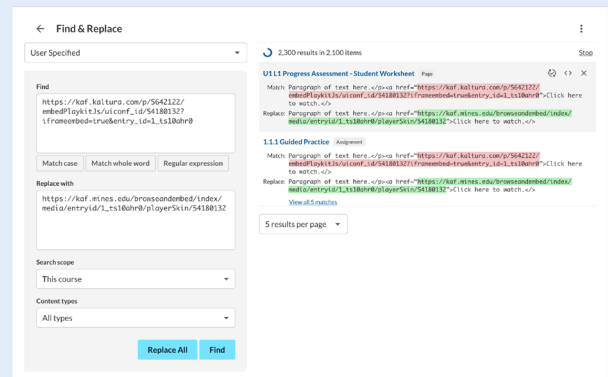

Effortless Content Retrieval

Atomic Search is an LTI 1.3 (Advantage) tool that helps you find learning content, files, assignments, discussions, modules, or any material within your Learning Management System quickly and easily.

Find & Replace Makes Course Management a Snap

Quickly locate, preview, and modify specific terms or links across your LMS, making content updates and course management more efficient than ever.

Usage Analytics

Teachers and administrators can view usage analytics, and admins can view account wide usage analytics.

A search box on every screen:

Discover the convenience of full organic integration with Canvas, Blackboard, and Brightspace. Easily find your search box no matter what LMS you have.

Hassle-free search for teachers:

Atomic Search indexes your materials, which helps you locate past assignments without the hassle of navigating through old files.

Smooth learning for students:

Help your students find answers effortlessly, making their learning journey smoother than ever.

Full power for administrators:

Effortlessly search the entire instance, not just one course. Managing your LMS has never been easier.

Supported Content Types

Pages

Files
