◉ Stress-free  ◉ Practical  ◉ Tailored for succes

### NCLEX Example

1 of 15  ⏱ 01:10

| History and Physical | Nurses' Notes | Vital Signs | Laboratory Results |
|---|---|---|---|

| Body System | Findings |
|---|---|
| Pulmonary | denies shortness of breath; reports discomfort in the lower left side of chest when taking a deep breath |
| Gastrointestinal | reports feeling abdominal fullness and is occasionally nauseated |
| Musculoskeletal | sustained an injury to the left rib cage after being struck by a mechanically pitched baseball in a batting cage last week; reports intermittent pain in the left shoulder rated 6/10 on the Numerical Rating Scale and feels light-headed; significant bruising to the shoulder; history of an orthoscopic repair to the left shoulder for a torn rotator cuff last year. |
| Psychosocial | client has not felt well enough to attend baseball practice since the injury |

The nurse in the emergency department (ED) is caring for a 17-year-old male client.

Which of the following assessment findings require immediate follow-up? Select all that apply.

☐ lung sounds
☐ shoulder pain
☐ laboratory results
☐ productive cough
☐ abdominal assessment findings
☐ pulse, respirations, and blood pressure
☐ temperature and pulse oximetry reading

# Easy-to-use assessment software

Interactive. Vibrant. Simple.
