- ✓ **Save Time** - Students, Teachers, and Admins
- ✓ **Easy to Adopt**

- ✓ **Affordable**
- ✓ **Free Pilot Test (On Your Canvas)**
- ✓ **Will be around in 6 months (and 10 years)**

Students

Help your students find the answers to that question they asked that one time about that assignment. Remember? No. Atomic Search gives your students the tools they need to find the answers they are looking for—without requiring a trip down memory lane.

Teachers

We know teachers work hard and the last thing you want to think about is how you are going to find the needle-in-the-haystack assignment you spent weeks creating last year. Or how does locating that one lesson plan that aligns with that one standard with a click of a button sound? Atomic Search indexes your course content, which means you can find that specific item in a snap.

Administrators

Perhaps you need to update the content of your school's online policies. It isn't a hard task, but it requires diligence as you read and update all of the pages in your Canvas instance. With the full Atomic Search app, admins are able to search the full Canvas instance—not just in a single course.
